Development of specific professional competencies of the company providing building maintenance services, adaptation of knowledge to changes in the economy

In October of 2018, UAB "Mano Būsto priežiūra" started the project "Development of specific professional competencies of the company providing building maintenance services, adaptation of knowledge to changes in economy".

The main goal of the project is to develop specific competencies of the company's employees, to improve their qualifications and to adapt to the changes in the economy. The project will provide training for 500 company administration staff and various customer service professionals.

Planned end of project activities – 8 October, 2021.

The project is being implemented under Priority 9 "Public Education and Enhancement of Human Resources Potential" of the European Union Funds Investment Operational Program 2014-2020.

The total value of this project is EUR 983 214.88, of which EUR 491 607.44 is from the European Social Fund.
